

Kozlov Denis

Male, 33 years, born on 1 June 1989

+7 (991) 1151529 — WhatsApp, Telegram
denilk2023@gmail.com — preferred means of communication

Reside in: Ulyanovsk
Citizenship: Russia, work permit at: Russia
Not ready to relocate, not ready for business trips

Desired position and salary

Frontend-разработчик

Specializations:

— Programmer, developer

Employment: full time

Work schedule: full day

travel time to work: any

Work experience —5 months

November 2022 — till
now
5 months

GeekBrains

IT, System Integration, Internet

- Internet Company (Search Engines, Payment Systems, Social Networks, Information and Educational, Entertainment Resources, Website Promotion etc.)

Web Developer (training)

I create websites and solve educational tasks

My Projects: <https://github.com/DenisLK/portfolio>.

In these projects, I developed a website based on the layout presented in Figma. My tasks:

- I wrote the HTML markup and site content code.
- I wrote the CSS code of the site's appearance.
- I wrote JavaScript code for the interactivity of the site.
- I made an adaptation of the site for different screens.

Education

Vocational secondary

2023

GeekBrains

Programming, Web Developer

2008

Ulyanovsk Automobile Engineering College

Automotive industry, Maintenance and repair of motor transport

Professional development, courses

2023

Programmer

GeekBrains, Web programming

| About me | <p>Not so long ago, I decided to knock on the IT sphere. As a child, I dreamed of being in motorsport, because I always loved to design and chose the role of a racing mechanic. After years of training and hard work, I achieved my goal and successfully worked as a mechanic in the Neva-Motorsport racing team in the Russian Circuit Racing Series, where our team successfully opposed other racing teams, including large factory teams (Lukoil, LADA Sport ROSNEFT). In 2022, our pilot won a prize in the Russian championship. I have achieved what I wanted-a successful job in a professional racing team. The automotive sector did not attract as much as before. There was a need to move on. I decided that I wanted to change my field of activity and reach heights in a new profession. I chose the sphere of the present and the future-IT. Since I always liked to design, create and want to see my results clearly, I decided to become a Frontend developer.</p> <p>Past work experience has developed in me such qualities as:</p> <ul style="list-style-type: none"> -The ability to solve non-standard tasks in a short time will help to effectively cope with new tasks. -Discipline will perfectly manifest itself in planning your tasks and respecting deadlines -Ability to work in a team. <p>I graduated from the Web developer course with honors, I continue to study JavaScript in depth, I study React on my own.</p> <p>In a new direction, I would like to find a cohesive team and solve interesting and complex tasks together.</p> |
